

INSONE

Sonic Success

INSONE stands for innovative, intelligent, and individual audio technologies.

INSONE develops scientifically-founded hardware and software solutions that are "Made in Germany".

INSONE helps companies to reach their goals.

Be part of our innovative audio technology start-up in LEIPZIG (GERMANY) as

Developer Audio DSP Software/VST plug-ins (m/f/d)

Your tasks

- Developing novel audio DSP algorithms, applications and plug-ins
- Managing all phases of the software life cycle including UI, test, release and maintenance
- Implementing new features in existing programs
- And, of course, contributing your own ideas to make our products even better

Your profile

- You have a degree with a technical reference (e.g. computer science, engineering, natural sciences, audio engineering, electrical engineering, information technology, business informatics, industrial engineering and management, business mathematics) or can demonstrate corresponding skills in another way.
- You can prove extensive experience in programming with C++.
- You have already worked with audio DSP and/or developed audio software.
- You are familiar with suitable APIs and frameworks (e.g. VST, JUCE, ...).
- You work independently, structured and conscientiously.
- You share our passion for music or good sound, maybe even play an instrument or like to sing.

Our offer

- You can arrange your working hours flexibly and work partly in your home office.
- You work on highly relevant issues and innovative solutions.
- You will gain insights into numerous subject areas.
- We offer you a steep learning curve and further training opportunities.
- We offer you a modern, highly motivated working environment near the Leipzig Rosental.
- The compatibility of family and career is very important to us.
- Our team will continue to grow, with many interesting career prospects.

Send your application with cover letter, CV and supporting documents to Mario at jobs@insone.de.

We are looking forward to hearing from you!
